

# The Frog Particle!

In the middle ages, a group of scientists, known as the ‘spontaneous generation’ theorists, watched frogs crawling from the mud, and assumed, ‘mud spontaneously creates frogs’! Perhaps, these scientists then began experiments, crushing mud, between bricks, as they tried to knock free, the ‘essence of frog’! Over time, their bricks would transform into large stones, powered by winches and gravitational forces, as the scientists sought their elusive, ‘frog particle’. Perhaps, they ground the remains of dead frogs, to extract their chemistry, in the hope they could reassemble a frog? It is easy to be amused by medieval scientists, and yet, in our modern era, are we any different? Science now believes that ‘mud creates frogs’, over evolutionary periods, created by ‘magic time’. However, stretching the time scale does not change the original premise, that ‘mud creates frogs’, and matter creates consciousness! In our modern era, we are as perplexed by ‘Rocks from Nothing’, creating consciousness, as the medieval scientists, were bewildered by frogs, ascending from mud!

However, 5000 years of mystical theory, suggests that the human psyche resembles this octet structure, appearing within the multi-dimensional, ‘genie’s bottle’ of the human body. If this image reflects reality, then we do not live in a random universe, created by ‘Big Bangs, from Nothing’. Instead, we live within a Shakespearean Theatre of consciousness, and we have a precise journey to complete, allowing us to return to Diamond Mind, and the fourth dimension of Eternal Awareness!

Western science proposes that our physical universe is surrounded by two mysterious dimensions, known as Dark Matter, and Dark Energy, with our physical universe, comprising less than 5% of the total universe. These concepts mirror the ancient mystics, who suggested that our physical universe is surrounded by two dimensions of consciousness, those of Dream and Deep Sleep, with the Waking Dimension of our physical universe, comprising 2.04081632...% of a Pi bubble, appearing within the Oceans of an Aware Multi-Verse!

The mystics' creation model of Eternal Awareness and consciousness, can be presented within this 64 Power image, revealing the Powers required to create the Multi-Verse!

The website, [www.theuniversechallenge.org](http://www.theuniversechallenge.org), offers a \$AUD10,000 Universe Challenge, between the two primary creation models, those of matter and consciousness!
