

# The \$AUD,10,000 Universe Challenge!

[www.theuniversechallenge.org](http://www.theuniversechallenge.org)

Ancient mysticism, including Plato's Cave Model, India's Aum theory, Chinese Taoism, and 60,000 years of the Aboriginal Dreaming, propose our universe is a structure of consciousness, and Eternal Awareness. Modern science, however, believes these two founding stones, are unnecessary ingredients, when constructing our universe, in the same way as racing cars, should always be purchased, without engines, gearboxes, and wheels, as the weight of these absurdly complex features, will limit the cars' high-speed performance!

It is Time then for a Universe Challenge, a philosophical, heavyweight 'Title fight', between science's matter-based creation theory, 'Rocks from Nothing', and the mystics' consciousness model, 'Quantum Images, upon an Eternal Mirror'. Can historical mysticism, solve the scientific dilemmas, surrounding mathematical Pi, the natures of Dark Matter and Dark Energy, the appearance of the 64 codons of DNA, and the perplexing realms, known as sub-particle chromodynamics, the 'eight-fold way'? Do the mystics, understand the Pythagorean Harmony, veiled within our Fibonacci solar system, and do their mystical insights, perceive the structures of our psyches, as they conjure into existence, our 'games of life'!

Further, the mystics' Theory of Everything, can be presented, as 64 'brush strokes' of Zen, with the last of these 'splashes of colour', representing the hard crust of matter, appearing within the waking dimension of consciousness. As we gaze upon this Hidden Splendour, we may see our individual destinies, forming as 'musical notes', within cosmic symphonies, and this Awakening, has the Power, to transform our world!
